This guide has been created to present the application for borrowing board games from the company library, as well as to outline its general capabilities.

The application has been designed to allow for easy tracking of the games borrowed. It enforces some ground rules for game reservation, which will be described in greater detail in the subsequent sections of the document.

The landing page of the application looks as follows:

Make sure the details on the page are correct and click Create Rental – if no conflicts exist, your reservation will be marked as **Guaranteed**:

Note, that all of your subsequent rentals for that day will be marked as **Optional**, and thus can be vetoed by other users:

You can veto other people's rentals as well in case you do not have any games borrowed for that day already, and the other person's rental is an optional rental:
